

CAROLINE WANJIKU MAINA

AI Automation & AI Solutions Developer

Nairobi, Kenya | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Automation and AI Solutions Developer with hands-on experience building and deploying practical AI-powered applications using Python, Generative AI, APIs, databases, and Streamlit. Experienced in designing end-to-end workflows that collect information, process it with AI, generate structured outputs, and connect applications to external services and databases. Built and deployed AI solutions including a Resume Screener, Meeting Summarizer, Sales CRM Assistant, an AI Research & Knowledge Agent using RAG and FAISS, and an AI Customer Inquiry & Lead Prioritization Automation. Interested in AI automation, intelligent workflows, AI solutions, and entry-level technology roles where I can apply practical problem-solving and continue developing my technical skills.

TECHNICAL SKILLS

- **Programming & Development:** Python • Git & GitHub • JSON • Application development
- **Artificial Intelligence:** Generative AI • Large Language Models (LLMs) • Prompt Engineering • AI workflow design • Structured AI outputs • AI application integration • Retrieval-Augmented Generation (RAG) • Embeddings • Vector search • FAISS
- **APIs, Databases & Integrations:** REST APIs • Supabase • PostgreSQL • Google Sheets API • Google Cloud • Database integration
- **Application & Automation Tools:** Streamlit • AI automation workflows • API integrations • Data processing • Workflow automation • Make

PROFESSIONAL EXPERIENCE

Freelance / Self-Employed — AI Automation Specialist

October 2025 – Present | Remote

- Design and build practical AI automation solutions and intelligent workflows for real-world business and productivity use cases.
- Develop end-to-end workflows that collect information, process it with AI, generate structured outputs, and trigger appropriate actions.
- Build and deploy AI-powered applications using Python, Generative AI, APIs, databases, and Streamlit.
- Integrate AI applications with external services and data platforms including Google Sheets, Google Cloud, Supabase, and PostgreSQL.
- Develop AI solutions for recruitment, meeting productivity, sales lead qualification, CRM workflows, document-based knowledge retrieval, and customer inquiry automation.
- Test, troubleshoot, and improve AI workflows, including handling API integrations, database connectivity, structured outputs, and reliability considerations.

PROJECTS

AI Resume Screener

Python | Gemini AI | Streamlit | PyPDF | Google GenAI

- Built and deployed an AI-powered recruitment application that analyzes resumes against job descriptions.

- Developed a workflow for uploading and extracting text from PDF resumes.
- Integrated Gemini AI to evaluate candidate information against job requirements.
- Generated resume scores and job-match scores and produced structured insights including candidate strengths and weaknesses.

AI Meeting Summarizer

Python | Gemini AI | Streamlit | Google Sheets API | Google Cloud

- Built an AI application that converts meeting notes and transcripts into structured, actionable information.
- Designed an AI workflow for processing meeting information and used Gemini AI to generate concise meeting summaries.
- Extracted decisions and action items and added downloadable structured results.
- Integrated Google Sheets for external data storage and worked with Google Cloud services, APIs, and service-account authentication.

AI Sales CRM Assistant

Python | Gemini AI | Streamlit | Supabase | PostgreSQL

- Built an AI-powered CRM workflow for capturing, storing, qualifying, and prioritizing sales leads.
- Designed a workflow for collecting new lead information and connected the application to Supabase/PostgreSQL for database storage.
- Integrated Gemini AI for lead qualification and prioritization.
- Designed an AI-assisted workflow for identifying high-priority opportunities and worked with database schemas and API-based integrations.

AI Research & Knowledge Agent

Python | RAG | FAISS | Embeddings | Gemini AI | Streamlit

- Built a Retrieval-Augmented Generation (RAG) application for document-grounded question answering.
- Processed documents and prepared text for semantic retrieval.
- Used embeddings and FAISS vector search to retrieve relevant document chunks.
- Integrated Gemini AI to generate answers grounded in retrieved evidence.
- Evaluated retrieval and answer quality, tested for unsupported answers and hallucination risk, and deployed the application using Streamlit.

AI Customer Inquiry & Lead Prioritization Automation

Google Forms | Make | Gemini AI | Google Sheets | Workflow Automation | Prompt Engineering

- Built an AI-powered workflow that automatically captures and processes customer inquiries and lead information.
- Connected Google Forms submissions to Make to detect new inquiries and trigger automated processing.
- Used Gemini AI to classify inquiries, assign priority levels and lead scores, and generate concise AI summaries.
- Automatically recorded structured customer and lead information in Google Sheets.

EDUCATION

Kenyatta University

Bachelor of Arts in Gender and Development | 2021 – 2024 | Second Class Upper Division

CERTIFICATIONS

AI Automation Specialist Certification — *SkillCertify* (Issued: August 2026)

- Validated foundational expertise in AI automation, workflow optimization, REST API integrations, and building end-to-end AI-powered solutions.

CORE STRENGTHS & LANGUAGES

Core Strengths: Problem Solving • Research & Analysis • Communication • Project Support • Digital Communication • AI Research • Continuous Learning

Languages: English • Kiswahili
